Tools for Deciding Where to Publish Your Paper

**JANE (Manuscript Matching Tool):** Description on site [http://jane.biosemantics.org/](http://jane.biosemantics.org/): “Have you recently written a paper, but you’re not sure to which journal you should submit it? Or maybe you want to find relevant articles to cite in your paper? Or are you an editor, and do you need to find reviewers for a particular paper? Jane can help!

Just enter the title and/or abstract of the paper in the box, and click on 'Find journals', 'Find authors' or 'Find Articles'. Jane will then compare your document to millions of documents in PubMed to find the best matching journals, authors or articles.

JANE relies on the data in PubMed, which can contain papers from predatory journals, and therefore these journals can appear in JANE’s results. To help identify high-quality journals, JANE now tags journals that are currently indexed in MEDLINE, and open access journals approved by the Directory of Open Access Journals (DOAJ).”

**Elsevier Journal Finder:** Description from site [https://journalfinder.elsevier.com/](https://journalfinder.elsevier.com/): “Elsevier® Journal Finder helps you find journals that could be best suited for publishing your scientific article. Please also consult the journal’s Aims and Scope for further guidance. Ultimately, the Editor will decide on how well your article matches the journal.

Powered by the Elsevier Fingerprint Engine™, Elsevier Journal Finder uses smart search technology and field-of-research specific vocabularies to match your article to Elsevier journals. Simply insert your title and abstract and select the appropriate field-of-research for the best results.”

**Edanz Journal Selector:** [https://www.edanzediting.com/journal-selector](https://www.edanzediting.com/journal-selector) Enter your abstract, and a list of the best possible journals that have published relevant papers will be generated. It filters results by field of study, IF, SCI-E Index and Open Access Options.
