Nursing Journals and Clinical Trials Registration

All information obtained from the journal's website

Advances in Nursing Science: No information on the topic

Advances in Skin & Wound Care: No information on the topic

American Association of Occupational Health Nurses Journal: No information on the topic

American Journal of Health Behavior: No information on the topic

American Journal of Hospice and Palliative Medicine: conforms to the ICMJE requirement that clinical trials are registered in a WHO-approved public trials registry at or before the time of first patient enrollment as a condition of consideration for publication. The trial registry name and URL, and registration number must be included at the end of the abstract.

American Journal of Maternal/Child Nursing: No information on the topic

American Journal of Nursing: All interventional studies should be registered in an approved, publicly accessible clinical trial registry such as www.clinicaltrials.gov. Authors must include the registration number in the cover letter. Authors of interventional research not registered should contact the editor-in-chief for a waiver before submitting the manuscript.

American Journal of Preventive Medicine: Manuscripts reporting clinical trials must include the following information on the title page: trial registry name and registration number, date of registration, funding source for the trial, and the name and date of approval of an institutional review board. The clinical trial registration number should also be reported in a section at the end of the abstract using the following format: Trial registration: This study is registered at www.clinicaltrials.gov NCT00672828. Acceptable trial registries include: www.clinicaltrials.gov, www.anzctr.org.au, www.isrctn.org. Other trial registration sites will be considered on an individual basis.

Applied Nursing Research: for experiments involving humans; Uniform Requirements for manuscripts submitted to Biomedical journals should be ensured. Link found in author guidelines for the journal: http://www.icmje.org/

 Archives of Psychiatric Nursing: if the work involves the use of human subjects, the author should ensure that the work described has been carried out in accordance with The Code of Ethics of the World Medical Association (Declaration of Helsinki) for experiments involving humans; Uniform Requirements for manuscripts submitted to Biomedical journals.

Asia-Pacific Journal of Oncology Nursing: Asia-Pacific Journal of Oncology Nursing favors registration of clinical trials and is a signatory to the Statement on publishing clinical trials in Indian biomedical journals. Asia-Pacific Journal of Oncology Nursing would publish clinical trials that have been registered with a clinical trial registry that allows free online access to public. Registration in the following trial registers is acceptable: http://www.ctri.in/; http://www.actr.org.au/; http://www.clinicaltrials.gov/; http://isrctn.org/; http://www.trialregister.nl/trialreg/index.asp; and http://www.umin.ac.jp/ctr. This is applicable to clinical trials that have begun enrollment of subjects in or after June 2008. Clinical trials that have commenced enrollment of subjects prior to June 2008 would be considered for publication in
Asia-Pacific Journal of Oncology Nursing only if they have been registered retrospectively with clinical trial registry that allows unhindered online access to public without charging any fees.

**Asian Nursing Research:** No information on the topic

**Australian Critical Care:** We encourage the prospective registration of studies. Where a study has been registered please give the number in your Author Checklist (e.g. ISRCTN) and include the registration number within the title, abstract or body of the paper as appropriate.

**Australian Journal of Advanced Nursing:** No information on the topic

**Australian Journal of Rural Health:** No information on the topic

**Bariatric Surgical Practice and Patient Care:** All manuscripts must be prepared in accordance with the "Uniform Requirements for Manuscripts Submitted for Biomedical Journals."

**Birth: Issues in Perinatal Care:** Manuscripts should conform to the specifications of the Uniform Requirements for Manuscripts Submitted to Biomedical Journals established by the International Committee of Medical Journal Editors (ICMJE).

**BMC Public Health:** BioMed Central supports initiatives to improve reporting of clinical trials. This includes prospective registration of clinical trials in suitable publicly available databases. In line with ICMJE guidelines, BioMed Central requires registration of all clinical trials that are reported in manuscripts submitted to its journals. Suitable publicly available registries are those listed on the ICMJE website as well as any of the primary registries that participate in the WHO International Clinical Trials Registry Platform, including the ISRCTN registry, which is administered and published by BioMed Central. The trial registration number (TRN) and date of registration should be included as the last line of the manuscript abstract. For clinical trials that have not been registered prospectively, BioMed Central encourages retrospective registration to ensure the complete publication of all results. Further information on retrospective registration is available from the AllTrials campaign, the Public Accounts Committee and the Department of Health. Many journals published by BioMed Central will consider manuscripts describing retrospectively registered studies. The TRN, date of registration and the words 'retrospectively registered' should be included as the last line of the manuscript abstract.

**Cancer:** requires that all prospective, randomized, controlled trials with patient enrollment starting on or after August 1, 2007, be registered in a public database that meets the requirements of the World Health Organization. Currently, such registries include the following: actr.org.au, clinicaltrials.gov, ISRCTN.org, umin.ac.jp/ctr/index/htm, and trialregister.nl. Upon submission, please provide the registration identification number and the URL for the trial’s registry in your cover letter.

**Cancer Nursing:** No information on the topic

**Clinical Journal of Oncology Nursing:** No information on the topic

**Clinical Nurse Specialist:** No information on the topic

**Clinical Nursing Research:** Submitted manuscripts should conform to the ICMJE Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals.

**College and University:** No information on the topic
Collegian: No information on the topic

Computers, Informatics, Nursing: No information on the topic

Critical Care Nurse: No information on the topic

European Journal of Cancer: Registration in a public trials registry is a condition for publication of clinical trials in this journal in accordance with International Committee of Medical Journal Editors recommendations. Trials must register at or before the onset of patient enrolment. The clinical trial registration number should be included at the end of the abstract of the article.

European Journal of Cardiovascular Nursing: conforms to the ICMJE requirement that clinical trials are registered in a WHO-approved public trials registry at or before the time of first patient enrolment as a condition of consideration for publication. The trial registry name and URL, and registration number must be included at the end of the abstract.

European Journal of Oncology Nursing: Registration in a public trials registry is a condition for publication of clinical trials in this journal in accordance with International Committee of Medical Journal Editors recommendations. Trials must register at or before the onset of patient enrolment. The clinical trial registration number should be included at the end of the abstract of the article.

Frontiers in Psychology: In accordance with the Clinical Trial Registration Statement from the International Committee of Medical Journal Editors (ICMEJ), all clinical trials must be registered in a public trials registry at or before the onset of participant enrollment. This requirement applies to all clinical trials that begin enrollment after July 1, 2005. To meet the requirements of the ICMJE, clinical trials can be registered with any Primary Registry in the WHO Registry Network or an ICMJE approved registry.

Gastroenterology Nursing: No information on the topic

Geriatric Nursing: No information on the topic

Heart & Lung: The Journal of Acute and Critical Care: yes, requires registration based on the ICMJE’s clinical trial registration policy. See link at end of document for more detailed information.

Holistic Nursing Practice: No information on the topic

International Journal of Chronic Obstructive Pulmonary Disease: Requires the registration of all clinical trials in a public trials registry at or before the time of first patient enrollment.

International Journal of Mental Health Nursing: No information on the topic

International Journal of Nursing Knowledge: No information on the topic

International Journal of Nursing Practice: The journal requires that clinical trials are prospectively registered in a publicly accessible database and clinical trial registration numbers should be included in all papers that report their results. Authors are asked to include the name of the trial register and the clinical trial registration number at the end of the abstract. If the trial is not registered, or was registered retrospectively, the reasons for this should be explained.
**International Journal of Nursing Studies:** We encourage the prospective registration of studies. Where a study has been registered please give the number in your Author Checklist (e.g. ISRCTN) and include the registration number within the title, abstract or body of the paper as appropriate.

**International Journal of Urological Nursing:** encourages authors submitting manuscripts reporting results from a clinical trial to provide the registration number and name of the clinical trial. Clinical trials can be registered in any of the following free, public clinical trials registries: www.clinicaltrials.gov, http://clinicaltrials-dev.ifpma.org/, http://isrctn.org/. The clinical trial registration number and name of the trial register will be published with the paper.

**International Nursing Review:** No information on the topic

**Japan Journal of Nursing Science:** requires that the clinical trials submitted for its consideration are registered in a publicly accessible database. Authors should include the name of the trial register and their clinical trial registration number at the end of their abstract. If you wish the editor to consider an unregistered trial, please explain briefly why the trial has not been registered.

**JMIR mHealth and uHealth:** For RCTs only: Starting in 2008, JMIR will routinely publish trial identifiers in the abstract. Please add the trial registration number to the ABSTRACT, after the section "Conclusions: ..." (e.g. "Registration: Clinicaltrials.gov NCT00102401, http://clinicaltrials.gov/ct2/show/NCT00102401"). If for any reason the trial was not registered, please provide an explanation (e.g. in the methods section and/or a cover letter to the editor).

**Journal for Specialists in Pediatric Nursing:** No information on the topic

**Journal of Addictions Nursing:** No information on the topic

**Journal of Advanced Nursing:** JAN has signed up to the All Trials Agreement and trials should be registered publicly. The registration number should be provided in your manuscript, after the abstract. Guidance is available from the World Health Organization and the U.S. National Institutes of Health. We cannot consider manuscripts reporting trials which were registered retroactively.

**Journal of American Heart Association:** In accordance with the Clinical Trial Registration Statement from the International Committee of Medical Journal Editors, all clinical trials in JAHMA must be registered in a public trials registry at or before the onset of participant enrollment. This requirement applies to all clinical trials that begin enrollment after July 1, 2005 and applies to all clinical trials, including Phase 1 studies. Any research study that prospectively assigns human participants or groups of humans to one or more health-related intervention(s) to evaluate the effects on health outcomes is considered a clinical trial. Those who are uncertain whether their trial meets the ICMJE definition of a clinical trial should err on the side of registration if they wish to seek publication.

**Journal of American Association of Nurse Practitioners:** adheres to the principles stated in the Uniform Requirements for Manuscripts Submitted to Biomedical Journals. (http://www.icmje.org/urm_main.html).

**Journal of American Psychiatric Nurses Association:** we encourage authors to register their clinical trials (at http://clinicaltrials.gov or other suitable databases identified by the ICMJE, http://www.icmje.org/publishing_10register.html). If your trial has been registered, please state this on the Title Page.
Journal of Cancer Education: No information on the topic

Journal of Cardiopulmonary Rehabilitation and Prevention: Manuscripts must conform to "Uniform Requirements for Manuscripts Submitted to Biomedical Journals".

Journal of Cardiovascular Nursing: No information on the topic

Journal of Child Health Care: Submitted manuscripts should be arranged according to the "Uniform Requirements for Manuscripts Submitted to Biomedical Journals". The full document is available at http://icmje.org.

Journal of Clinical Nursing: We require that clinical trials are prospectively registered in a publicly accessible database and clinical trial registration numbers should be included in all papers that report their results. Please include the name of the trial register and your clinical trial registration number at the end of your abstract. If your trial is not registered, or was registered retrospectively, please explain the reasons for this.

Journal of Community Health Nursing: No information on the topic

Journal of Emergency Nursing: No information on the topic

Journal of Family Nursing: Submitted manuscripts should conform to the ICMJE Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals.

Journal of Health Care for the Poor and Underserved: No information on the topic

Journal of Holistic Nursing: Submitted manuscripts should conform to the ICMJE Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals.

Journal of Hospice and Palliative Nursing: No information on the topic

Journal of Midwifery and Women’s Health: Clinical trials started after May 2005 must be registered with a central registry.

Journal of Neuroscience Nursing: No information on the topic

Journal for Nurse Practitioners: for experiments involving humans; Uniform Requirements for manuscripts submitted to Biomedical journals should be ensured.

Journal of Nursing Administration: No information on the topic

Journal of Nursing Care Quality: No information on the topic

Journal of Nursing Scholarship: No information on the topic

Journal of Obstetric, Gynecologic & Neonatal Nursing: No information on the topic

Journal of Pain and Symptom Management: No information on the topic

Journal of Pediatric Health Care: No information on the topic

Journal of Pediatric Nursing: No information on the topic

Journal of Pediatric Oncology Nursing: conforms to the ICMJE requirement that clinical trials are registered in a WHO-approved public trials registry at or before the time of first patient enrolment as a condition of consideration for publication. The trial registry name and URL, and registration number must be included at the end of the abstract.

Journal of Perinatal & Neonatal Nursing: No information on the topic

Journal of PeriAnesthesia Nursing: No information on the topic

Journal of Professional Nursing: No information on the topic

Journal of School Nursing: No information on the topic

Journal of Sports Sciences: No information on the topic

Journal of the Association of Nurses in AIDS Care: No information on the topic

Journal of Tissue Viability: Registration in a public trials registry is a condition for publication of clinical trials in this journal in accordance with International Committee of Medical Journal Editors recommendations. Trials must register at or before the onset of patient enrolment. The clinical trial registration number should be included at the end of the abstract of the article.

Journal of Transcultural Nursing: No information on the topic

Journal of Wound, Ostomy and Continence Nursing: No information on the topic

Midwifery: guidelines generally follow the 'Uniform Requirements for Manuscripts Submitted to Biomedical Journals', published by the International Committee of Medical Journal Editors (ICMJE).

New England Journal of Medicine: The ICMJE requires that “any research project that prospectively assigns human subjects to intervention and comparison groups to study the cause-and-effect relationship between a medical intervention and a health outcome” must be registered before the start of patient enrollment. Trials in which the primary goal is to determine pharmacokinetics are exempt. To be acceptable, a registry must be owned by a non-for-profit entity, be publicly accessible, and contain
the twenty fields proposed by the World Health Organization. View a list of acceptable registries on the ICMJE website. Each manuscript will be checked upon submission to determine whether the study needed registration, and if registered, whether the registration is complete and meaningful. Manuscripts will not enter the editorial process until they have passed this screen. All studies which began enrolling patients after July 1, 2005, must have been registered before patient enrollment. Any trial which was still seeing patients on September 13, 2005, should have been registered before September 13, 2005. If the trial was complete before September 13, 2005, the study should be registered before submission.

**Nicotine & Tobacco Research**: If the paper reports the results of a clinical trial, authors should indicate whether or not the study has been preregistered. If the trial has been preregistered, authors must report the trial number and the preregistration authority/organization in the paper.

**Nurse Education in Practice**: No information on the topic

**Nurse Education Today**: The work described in your article must have been carried out in accordance with the Uniform Requirements for manuscripts submitted to Biomedical journals http://www.icmje.org. This must be stated at an appropriate point in the article.

**Nursing Critical Care**: No information on the topic

**Nursing Ethics**: we encourage authors to register their clinical trials (at http://clinicaltrials.gov or other suitable databases identified by the ICMJE). If your trial has been registered, please state this on the Title Page.

**Nursing & Health Sciences**: The journal requires that the clinical trials submitted for its consideration are registered in a publicly accessible database. Authors should include the name of the trial register and their clinical trial registration number in the ‘Acknowledgements’ section of their manuscript. If you wish the editor[s] to consider an unregistered trial, please explain briefly why the trial has not been registered.

**Nursing History Review**: No information on the topic

**Nursing Inquiry**: endorses the International Committee of Medical Journal Editors (ICMJE)’s Uniform Requirements for Manuscripts, which can be found at http://www.icmje.org/.

**Nursing Management**: No information on the topic

**Nursing Outlook**: No information on the topic

**Nursing Philosophy**: No information on the topic

**Nursing Research**: To be considered for peer review, randomized clinical trials (RCTs) must have been registered before enrollment of the first participant. This requirement applies to pilot and full-scale RCTs. Registration is also required for consideration of brief reports describing protocols for full-scale RCTs. Reports of findings from unregistered clinical trials will be returned and will not be peer reviewed. Trials should be registered on acceptable databases listed at one of these sites: WHO - http://www.who.int/ictrp/network/primary/en/index.html; CLINICALTRIALS.GOV - https://clinicaltrials.gov/. Include the registry and trial number on the title page of the manuscript and in response to the Author Questionnaire item about clinical trial registration.
**Oncology Nursing Forum:** No information on the topic

**Orthopaedic Nursing:** No information on the topic

**Pain Management Nursing:** If the work involves the use of human subjects, the author should ensure that the work described has been carried out in accordance with The Code of Ethics of the World Medical Association (Declaration of Helsinki) for experiments involving humans; Uniform Requirements for manuscripts submitted to Biomedical journals.

**Pediatric Exercise Science:** Abides by uniform requirements for manuscripts submitted to biomedical journals.

**Pediatrics:** If authors report the results of a clinical trial, they must affirm that the study has been registered at www.clinicaltrials.gov or another WHO-approved national or international registry prior to the enrollment of the first subject. The trial registration number must be listed on the title page, and at the end of the abstract.

**Perspectives in Psychiatric Care:** No information on the topic.

**Psycho-Oncology:** We require that clinical trials are prospectively registered in a publicly accessible database and clinical trial registration numbers should be included in all papers that report their results. Please include the name of the trial register and your clinical trial registration number at the end of your abstract. If your trial is not registered, or was registered retrospectively, please explain the reasons for this.

**Public Health Nursing:** No information on the topic

**Rehabilitation Nursing:** follows the ICMJE Uniform Requirements for Manuscripts Submitted to Biomedical Journals.

**Research and Theory for Nursing Practice:** No information on the topic

**Research in Nursing and Health:** yes, authors must demonstrate compliance with the ICMJE expectations. See link at end of document for more detailed information.

**Scandinavian Journal of Caring Sciences:** We require that clinical trials are prospectively registered in a publicly accessible database and clinical trial registration numbers should be included in all papers that report their results. Please include the name of the trial register and your clinical trial registration number at the end of your abstract. If your trial is not registered, or was registered retrospectively, please explain the reasons for this.

**Seminars in Oncology Nursing:** No information on the topic

**Social Science and Medicine:** No information on the topic

**Supportive Care in Cancer:** No information on the topic

**Western Journal of Nursing Research:** we encourage authors to register their clinical trials at http://clinicaltrials.gov or other suitable databases identified by the ICMJE (see Clinical Trials Registration). If your trial has been registered, please state this on the Title Page.
Workplace Health & Safety: we encourage authors to register their clinical trials (at http://clinicaltrials.gov or other suitable databases identified by the ICMJE, http://www.icmje.org/publishing_10register.html). If your trial has been registered, please state this on the Title Page.

Worldviews on Evidence-Based Nursing: No information on the topic

For further information, visit: http://www.icmje.org/icmje-recommendations.pdf and/or http://www.icmje.org/recommendations/browse/publishing-and-editorial-issues/clinical-trial-registration.html

For a list of journals that follow clinical trial guidelines, visit: http://www.icmje.org/journals-following-the/icmje-recommendations/
